CONTENTS OF ISSUE 138(1)

Extended and Updated Selected Papers from the SMiRT-11 Post-Conference Seminar No. 12 on IMPACT AND LARGE DEFORMATION MECHANICS
Tokyo, Japan, August 26–27, 1991

Edited by T. Aizawa, T. Belytschko and W.K. Liu

ALE finite elements with hydrodynamic lubrication for metal forming, *W.K. Liu, Yu-Kan Hu and T. Belytschko* 1
Recent developments in DYNA3D for impact problems, *R.G. Whirley and B.E. Engelmann* 11
Recent developments in NIKE2D for metalforming analysis and low rate impact, *B.E. Engelmann and R.G. Whirley* 23
Dynamic response of steel pipe arch under impact loading, *N. Ishikawa, T. Hoshikawa, S. Katsuki and T. Iida* 37
Local damage of reinforced concrete slabs by impact of deformable projectiles, *T. Ohno, T. Uchida, N. Matsumoto and Y. Takahashi* 45
Appropriate remeshing for finite element impact analysis with consideration of error and computing efficiency, *T. Torigaki and N. Kikuchi* 53
High performance algorithms for the solution of general contact–impact problems, *L. Nilsson and Z.H. Zhong* 65
Some parametric sensitivity analyses for high velocity impact computations, *G.R. Johnson and J.A. Schonhardt* 75
Target resistance for long-rod penetration into semi-infinite targets, *C.E. Anderson, Jr., J.D. Walker and G.E. Hauver* 93
Impulsive local damage analyses of concrete structures by the distinct element method, *N. Kusano, T. Aoyagi, J. Aizawa, H. Ueno, H. Morikawa and N. Kobayashi* 105
Application of an impact analysis code to reinforced concrete structures, *M. Ueda, T. Shirai, Y. Doi, M. Otaki and H. Saito* 111
Introduction of coupled thermomechanical equations into a hydrocode, *M. Itoh, M. Katayama, H. Obata, K. Moriya and S. Murakami* 117

Announcement: SMiRT-12 Conference 123

Instructions to contributors 125

CONTENTS OF ISSUE 138(2)

Extended and Updated Selected Papers from the SMiRT-11 Post-Conference Seminar No. 10 on STRUCTURAL MECHANICS AND MATERIAL PROPERTIES IN RADIOACTIVE WASTE REPOSITORY TECHNOLOGY
August 26–27, 1991, University of Kanazawa, Japan

Preface, *F.H. Wittmann* i

Part I: Durability and Permeability of Concrete

Estimation of the service life of concrete under different conditions with special reference to radioactive waste repositories, *S.E. Pihlajavaara* 127
Alteration behavior of 67 years old tunnel lining concrete, *H. Saito, H. Hasegawa and S. Nakane* 135
Degradation of concrete buried in soil with saline ground water, *Y. Fujiwara, T. Maruya and E. Owaki* 143
Preliminary experimental study on the deterioration of cementitious materials by an acceleration method, *H. Saito, S. Nakane, S. Ikari and A. Fujiwara* 151
Long term behavior of concrete in nuclear waste repositories, *F. Jacobs and F.H. Wittmann* 157
Experimental study on the water permeability of a reinforced concrete silo for radioactive waste repository, *K. Iriya, Y. Itoh, M. Hosoda, A. Fujiwara and Y. Tsuji* 165
Experimental determination and numerical simulation of the permeability of cementitious materials, *G. Mayer, F. Jacobs and F.H. Wittmann* 171

Part II: Material and Structural Aspects of Radioactive Waste Repositories

Application of concrete to the treatment and disposal of radioactive waste in Japan, *Y. Maki and H. Ohnuma* 179
Studies on material properties and structural mechanics of engineered barriers for HLW geological isolation, *N. Sasaki, M. Yui, K. Hara, H. Ishikawa and T. Tsuboya* 189
Thermo-mechanical analyses of the HAW testfield, *J. Prij and L.F.M. Hamilton* 203
Prediction of permeability changes in an excavation response zone, *N. Kinoshita, T. Ishii, H. Kuroda and H. Tada* 217
A method for examining ground water flow and solute transport around a repository, *A. Kobayashi and Y. Harada* 225

Instructions to contributors 237

CONTENTS OF ISSUE 138(3)

Extended and Updated Selected Papers from the 5th JAPANESE–GERMAN JOINT SEMINAR
Munich, Germany, October 11–12, 1990

Preface, *K. Kussmaul* i

Analysis of stress corrosion cracking life based on reaction model, *K. Yamauchi, S. Kimura, T. Katori, K. Sigehiro and T. Shindo* 239
Analysis of leak and break behavior in a failure assessment diagram for carbon steel pipes, *S. Kanno, K. Hasegawa, T. Shimizu, T. Saitoh and N. Gotoh* 251
Procedure of crack shape determination by Reversing DC Potential Method, *Y. Hashimoto, Y. Urabe, S. Masamori, Y. Kamiwaki and K. Baba* 259
Recent achievements at PNC in the development of high temperature structural design methods for FBR components, *A. Imazu, K. Iwata, Y. Wada and T. Nagata* 269
Development of the evaluation method for crack propagation due to thermal striping, *T. Shimakawa, K. Take, M. Uno, S. Takamatsu, Y. Takahashi and N. Miura* 283
A review of fatigue failures in LWR plants in Japan, *K. Iida* 297

Regular Papers

Quantification of severe accidents source terms of BWR 4 reactor with Mark I containment using source term code package, *M. Lee and G.D. Lee* 313
Experimental evaluation of an operator decision aid system for BWR power plants, *S. Fukutomi, S. Yoshimura and J. Itoh* 339
COMPBRN IIIe – a computer code for probabilistic fire risk analysis, *V. Ho and G. Apostolakis* 357
Rewetting of hot horizontal tubes, *A. Abdul-Razzak, M. Shoukri and A.M.C. Chan* 375
Analysis of heat and mass transfer to determine heat loss and the rate of condensation of the MVSTs off-gas ducts, *M.A. Ebadian, G. Yang, E. Bigzadeh, J.F. Walker and T.J. Abraham* 389
Pellet–clad mechanical interaction: pellet–clad bond failure and strain relief, *S.P. Walker, A.Yu and R.T. Fenner* 403

Announcements: SMiRT 12 Conference and Short Courses on Multiphase Flow and Heat Transfer 409
